Discount Packages

NOTE: The discounting mechanism is a club facility.

It is designed for clubs to be able to provide groups with discounted subscriptions based on the number of people and their membership type. The discount applies to the club element of the subscription only. Hence is a structure such as this:

National	10
Regional/State	20
Group/Region	30
Club	40

A 10% discount would be \$4.00 being only the club element that is discounted.

Equally the \$4.00 will be deducted from the amount for the club.

NOTE: The discount can be set to be a percentage or an amount. The percentage will always be that percentage of the club element, if the percentage is ignored and the amount is entered the discount will be the lower of the amount stated and the amount for the club. So the three members with the structure above would gain a \$75 discount if that was entered on the discount structure but would only get \$120 discount if an amount above \$120 was entered since this is more than the amount being paid to the club.

Setup

The starting screen allows you to define the package that the family or group must match to get the discount. Discount Package

Discount Package

* Name

Recreational Swimmer	*	4		~	Delete
Competitive Swimmer	~	1	1	*	Delete
	~			~	

4 swimmer

NOTE: The name can be anything, it has no relevance to the package hence this one is called 4 swimmers but actually is 4 recreational swimmers and a competitive swimmer. That is user choice as to what it is called.
